

6. A method according to any one of the preceding claims, characterized in that T_2 is in the range 10 – 40 °C.
7. A method according to any one of the preceding claims, characterized in that T_4 is lower than or equal to T_2 , said optional difference being 1 – 2 °C.
5
8. A method according to any one of the preceding claims, characterized in that T_3 is lower than or equal to T_2 , said difference being 1 – 2 °C.
10
9. A method according to any one of the preceding claims, characterized in that the liquid (6) supplied to the carriers (5) is preferably water.
10. A method according to any one of the preceding claims, characterized in that a negative pressure is established in the drum (4) during its treatment of the blocks of meat (1) and/or the units of meat (2).
15
11. A method according to any one of the preceding claims, characterized in that the drum (4) continues its rotation/revolution after the blocks of meat (1) having been broken up into units of meat (2).
20
12. A method according to any one of the preceding claims, characterized in that the carriers (5) are constructed asymmetrically, and that, during rotation, the drum (4) changes its direction of revolution, whereby the blocks of meat (1) and/or the units of meat (2) are caused to contact changing sides of the same carriers (5).
25
13. Use of a method according to claims 1 – 12 for the thawing of frozen meat.
30
14. A system for carrying out the method according to claims 1 – 12,

characterized by a massage system (3) comprising a drum (4); at least one carrier (5); a chamber for providing a negative pressure, preferably by means of a pump; and a system for recirculating a liquid (6) between the interior of the carriers (5) and a heat reservoir.
